DESCRIPTION

This project provides for the evaluation of the drainage conditions within the Town of Chevy Chase and construction in the four most critical sectors. The Town is divided into fourteen drainage areas (sectors). Design for the four sectors was completed in the Facility Planning: Storm Drain project. Ten sectors will be evaluated and if the existing facilities are found to be inadequate, design will be developed for the necessary drainage improvements. This project will implement construction on an as-needed basis until the necessary improvements to the entire drainage system have been completed.

JUSTIFICATION

Private properties and portions of the roadways within the Town of Chevy Chase are inundated during every rainfall event. This project was initiated at the request of the Town of Chevy Chase to address these severe drainage deficiencies.

Construction for the 4 sectors in FY08 includes improvements along East Avenue, Oakridge Avenue, Maple Avenue, Thornapple Street, Stanford Street, Chatham Road, Meadow Lane, Blackthorn Street, Woodbine Street, Leland Street, and Aspen Street. Construction funding for the remaining ten sectors is not included at this time, but will be included in a later budget submission.

OTHER DISCLOSURES

- A pedestrian impact analysis has been completed for this project.
